

INVITATION

We have the honor to invite you to participate to the 6th International Workshop of Electromagnetic Compatibility **CEM 2009** organized by the National Institute for Research and Development in Electrical Engineering INC DIE ICPE-CA, Bucharest, Romania.

The aim of the workshop

The workshop will be a good reason for the dissemination and promoting of the Romanian and foreign scientific researches results, knowledge of the newest achievements in the approached thematic domain, the maintaining of direct contact among the specialists, opening, development of the new research directions, identification of the creating possibilities of some consortia with the polarization of the values research forces regarding the approaching of some large projects and participations to the European research programs.

The Workshop Thematic

It will approach the following aspects:

- ✚ electromagnetic compatibility in the domains: electronics, communications systems, industrial systems;
- ✚ biocompatibility;
- ✚ human exposition effects to the electromagnetic fields;
- ✚ problems regarding the measurements.

LOCATION

Constanța is in a region of Romania called Dobrogea, which is the land between the Danube River to the west and Black Sea to the east. The history of the city goes back to 657 BC when it was the Greek controlled town of Tomis. When Romania became a Province of the Roman Empire in 106 AD the Romans later renamed the city after emperor Constantine who fortified and developed the city from 320 - 350AD. The city was later destroyed in the 8th century by invading Slavs and Avars and then fell under Byzantine control. In 1418 the Turks had there turn at the region until the mid 1800s when the national state of Romania was created in 1862. Constanța was taken by Romania in 1877 after the Romanian War of Independence.

The Port of Constanța is the main Romanian port and the largest port in the Black Sea. It has a geostrategical position being located on the route of two Pan-European Transport Corridors: river Corridor VII (Danube) and rail-road Corridor IV. In the southern part of Constanța Port there is a river-maritime sector, which allows the accommodation of maritime vessels and river vessels as well. The two satellite ports, Midia and Mangalia, are located close to the port of Constanța and perform a vital function in the overall port framework.
